Helping all people live healthy lives

## Safety Without Compromise

### BD SafetyGlide™ Needle

# Step-by-Step Safety

## 1 Aspiration

- Aspirate medication into syringe as per your usual technique.

## 2 Injection

- Administer injection following established technique.
- For user convenience, the needle "bevel-up" position is oriented to the lever arm. (Bevel up = lever arm up)

## 3 Activation

- After injection, immediately apply a single finger stroke to the Activation-Assist™ lever arm to activate the shielding mechanism.

# BD SafetyGlide™ Needle: where safety meets performance

## EASE OF USE

- Single-handed activation
- Minimal change in technique
- Minimal training

## SAFETY

- Secure and visible lock
- Virtually no splatter upon activation

## PATIENT CARE

- Activation occurs after needle is withdrawn: no negative impact to the patient

## EFFICIENCY

- Detachable needles fit on any size conventional syringe
- Facilitates standardization and SKU reduction

### PRIOR TO ACTIVATION

### AFTER ACTIVATION

**Use BD SafetyGlide™ Syringes  
for all your insulin, TB and allergy needs.**

## Setting the standard in safety

More than a decade ago, BD pioneered safety injection with the introduction of BD Safety-Lok™, the world's first safety-engineered syringe. BD has since set a new standard in safety with the BD SafetyGlide™ Needle, a single-handed, needle-based safety device and the new smaller-dose BD SafetyGlide™ Syringe.

BD, the industry leader in safety injection, offers the most extensive array of safety-engineered injection products available. BD's record of innovation spans more than a century and our continued investment in safety technology shows our commitment to providing innovative products and solutions for the future.
